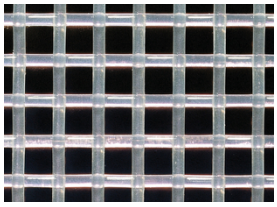
Product Features

Material features

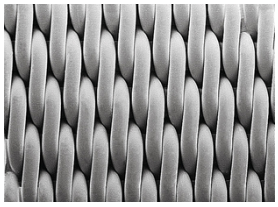
Sefar offers a wide range of filtration media and highly industrialized fabrication capabilities.
Inherent to our synthetic materials are:

- Good fatigue properties compared to metal mesh
- Easy to handle and no sharp edges
- High strength and tear resistance
- Non-shedding properties

Open mesh fabric



Closed mesh fabric



Depth filter material

Go to content

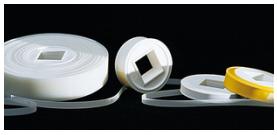
- High precision and reliable mesh opening
- Low pressure drop
- Various surface modifications available
- High performance polymers for extreme and harsh conditions

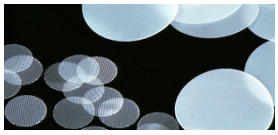
- Highly efficient particle retention
- High throughput
- Excellent surface properties

- Highly efficient particle retention
- Low pressure drop
- Resistant to corrosion caused by fuels and blends
- Maximized filtration area
- State-of-the-art bonding technology

Fabrication & Converting Solutions

Information on our fabrication capabilities can be found by following the links below:





- **Customer specific**

For further information please call us, we will also gladly send you fabric samples!
