# are used in a large variety of forms.

# **Fabrication solutions**

Sefar's filter discs are characterized by their precise fit and easy installation. The disc edges can be fabricated using laser cutting, hemmed or taped with reinforcement. In our wide range of filter materials (polypropylene, polyester, PEEK and PTFE fabric), we can supply you with the optimal solution for your application's chemical and thermal requirements. Special bag versions are available as customized solutions.

# **Sefar filter solutions for OEM**

Our products meet the specific needs of these filtration applications and are successfully running all over the world on all known nutsche filter brands and OEMs, such as:

Comber	Heinkel	Mavag AG	Waldner
Bachiller	Delta		

# Filter media technology

Sefar's **D**ouble **L**ayer **W**eave technology combines fine filter fabric together with a rugged backing cloth.

C.P. 54719

SEFAR TETEX DLW fabrics are produced in our European facilities to meet the highest quality requirements and offer these decisive advantages:

- Low downtime
- High product yield
- Ease of installation
- Excellent cake release
- Minimal product contamination

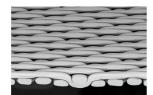

In addition to DLW fabrics, monofilament and multifilament fabrics are also available to ensure an optimal design.

# Double-layer fabric

# With integrated backing cloth for excellent drainage

and stability

# Monofilament fabric

For maximum

permeability and optimal cleaning

properties

### Multifilament fabric

For maximum particle

retention, strength

and cloth flexibility

# Specially made for life science industries

Sefar controls every crucial production step from yarn production to the ready-to-use
